

THE MAJOR BIOMES POSTER PROJECT:

Purpose: Create a poster that describes one of the 12 Major Biomes. For the Biome of your choice, include the answers to the questions.

Time to get creative: Using pages 100-112 from the textbook, be as creative as you want. Whatever the biome you chose, make it appropriate, visually appealing, and informative.

Biome Options (may be chosen at Random):

Biome Option 1: Tropical Rain Forest

- What is a description of this biome?
- What terms should we know about this biome?
- What are the abiotic/biotic factors of this biome?
- What is the dominant flora (plants) & fauna (animals) of this biome?
- What is its' geographical distribution (location)?
- What does a climatograph for this biome look like?

Due Date:

Biome Option 2: Tropical Dry Forest

- What is a description of this biome?
- What terms should we know about this biome?
- What are the abiotic/biotic factors of this biome?
- What is the dominant flora (plants) & fauna (animals) of this biome?
- What is its' geographical distribution (location)?
- What does a climatograph for this biome look like?

Biome Option 3: Tropical Savanna

- What is a description of this biome?
- What terms should we know about this biome?
- What are the abiotic/biotic factors of this biome?
- What is the dominant flora (plants) & fauna (animals) of this biome?
- What is its' geographical distribution (location)?
- What does a climatograph for this biome look like?

Biome Option 4: Desert

- What is a description of this biome?
- What terms should we know about this biome?
- What are the abiotic/biotic factors of this biome?

- What is the dominant flora (plants) & fauna (animals) of this biome?
- What is its' geographical distribution (location)?
- What does a climatograph for this biome look like?

Biome Option 5: Temperate Grasslands

- What is a description of this biome?
- What terms should we know about this biome?
- What are the abiotic/biotic factors of this biome?
- What is the dominant flora (plants) & fauna (animals) of this biome?
- What is its' geographical distribution (location)?
- What does a climatograph for this biome look like?

Biome Option 6: Temperate Woodland & Shrubland

- What is a description of this biome?
- What terms should we know about this biome?
- What are the abiotic/biotic factors of this biome?
- What is the dominant flora (plants) & fauna (animals) of this biome?
- What is its' geographical distribution (location)?
- What does a climatograph for this biome look like?

Biome Option 7: Temperate Forest

- What is a description of this biome?
- What terms should we know about this biome?
- What are the abiotic/biotic factors of this biome?
- What is the dominant flora (plants) & fauna (animals) of this biome?
- What is its' geographical distribution (location)?
- What does a climatograph for this biome look like?

Biome Option 8: Northwestern Coniferous Forest

- What is a description of this biome?
- What terms should we know about this biome?
- What are the abiotic/biotic factors of this biome?
- What is the dominant flora (plants) & fauna (animals) of this biome?
- What is its' geographical distribution (location)?
- What does a climatograph for this biome look like?

Biome Option 9: Boreal Forest

- What is a description of this biome?
- What terms should we know about this biome?
- What are the abiotic/biotic factors of this biome?
- What is the dominant flora (plants) & fauna (animals) of this biome?

- What is its' geographical distribution (location)?
- What does a climatograph for this biome look like?

Biome Option 10: Tundra & Polar Ice Caps (pg 105)

- What is a description of this biome?
- What terms should we know about this biome?
- What are the abiotic/biotic factors of this biome?
- What is the dominant flora (plants) & fauna (animals) of this biome?
- What is its' geographical distribution (location)?
- What does a climatograph for this biome look like?

Biome Option 11: Freshwater Ecosystems

- What are the two main types of this ecosystem?
- Describe each type of ecosystem and give examples?
- What terms should we know about this biome?
- What are the abiotic/biotic factors of this biome?
- What is the dominant flora (plants) & fauna (animals) of this biome?
- What is its' geographical distribution (location)?

This type of ecosystem (Freshwater) includes Estuaries, you may include a separate page for this.

Biome Option 12: Marine Ecosystems

- What are the photic zones of this ecosystem?
- Describe the following of this ecosystem and give examples:
 - Intertidal Zone
 - Coastal Oceans
 - Coral Reefs
- What terms should we know about this biome or parts of this biome?
- What are the abiotic/biotic factors of this biome?
- What is the dominant flora (plants) & fauna (animals) of this biome?
- What is its' geographical distribution (location)?
